RCCD #MA8-1-G L21

Dear Mr. Fiegenbaum;

On this date RCCD staff witnessed eight test pits for a proposed residential subdivision to create one new lot. The designer representing the owner was Chris Berry.

The following features were observed:

<u>Test Pit</u>	<u>Seasonal High Water Table</u>	<u>Total Depth</u>	<u>Bedrock</u>	<u>Pass/Fail</u>
1	13"	44"	no	fail
2	24"	60"	no	pass
3	20"	36"	yes	fail
4	25"	72"	no	pass
5	18"	40"	no	fail
6	24"	60"	yes	pass
7	27"	60"	no	pass
8	28"	72"	no	pass

Test pits 2, 4, 6, 7, and 8 meet town and state soil and slope requirements for wastewater disposal.

Test pit 3 does not meet local soil requirements because bedrock was found less than 60" from the surface.

Test pits 1, 3, and 5 do not meet local soil requirements because the seasonal high water table was found less than 24" from the surface.

A test pit field summary is attached.

Sincerely,

A handwritten signature in cursive script that reads "Michael Cuomo".
