Description of proposed conditional use:  
 PSNH proposes to replace two poles along the M183 Transmission Line in the Town of Madbury. The proposed work will occur within the existing, maintained right-of-way (ROW) and no additional widening of the ROW is proposed. The wooden poles will be replaced with steel poles within ten feet of the original pole location. Pole height increases are necessary to maintain minimum clearance safety standards. Timber matting will be used within wetlands to minimize and prevent rutting and compaction. In addition, the project utilizes existing access routes within the ROW to the greatest extent to limit and prevent new disturbance. Upon completion of work, timber mats will be removed and temporarily disturbed wetlands will be restored by seeding and mulching.

A complete application must include a \$200 application fee.
