Re: Application for Conditional Use Permit  
Stormwater Improvement Project  
New England Metals Recycling LLC, Knox Marsh Road, Route 155, Madbury NH

Dear Planning Board,

On June 22, 2009 representatives from New England Metal Recycling (Keri Fitzpatrick) and Woodard & Curran (David White) explained the proposal for a stormwater improvement project at the Knox Marsh Rd facility to the Madbury Conservation Commission (MCC). The project may require conditional use permits in regard to the Aquifer and Wellhead Protection Overlay District and the Wet Area Conservation Overlay District which allow for recommendations from the MCC.

The MCC sees the proposal as an improvement to the existing conditions at the facility, and believes the encroachment on the 75 foot construction setback and impact to the 25 foot undisturbed, naturally vegetated buffer of the existing wetland are acceptable trade-offs for improved stormwater treatment.

Respectfully,
