Subj: Reliable Equipment CUP Inspections

On 15 May 2013 the Madbury Planning Board approved a request for a CUP from Ron Severino on behalf of Reliable Equipment LLC on 349 Mast Road in Dover NH. An Environmental Protection Plan prepared by Civilworks, Inc., was submitted detailing the steps the company would follow to ensure compliance.

The following snippet documents the reporting requirements for the Spill Response Plan.

6.0 REPORTING REQUIREMENTS

6.1 On-Site Documentation

All Monthly Inspection Checklists and Holding Tank and Oil/Grit Chamber pumping records shall remain on-site and available for inspection for the duration of the operation by both the Town and NHDES.

The following snippet documents the reporting requirements for the Stormwater Management Inspection & Maintenance Plan.

Annual Report

Prepare an annual Inspection & Maintenance Report at the end of each year. The report should include a summary of the system's maintenance requirements and repairs; and copies of the Inspection & Maintenance Log Sheets. This Annual Report should be kept on site and be made available to the Town of Madbury Building Inspector or Selectmen's representative.

I couldn't find any reference to frequency of inspections. The selectmen may want to weigh in on this.
